Portfolio: www.abhikadi.com | +91 9032622068 | abhiramkadimetla@gmail.com | linkedin.com/in/abhiram-kadimetla

8+ years of experience specializing in user-centered design for enterprise, web, and mobile applications. Master's degree in Human-Computer Interaction and proficiency in Figma. Expertise in creating impactful design solutions across healthcare, automotive, e-commerce, and network systems domains.

EDUCATION

University of Maryland, College Park - M.S in Human-Computer Interaction

August 2021 - May 2023

VNR VJIT, India - B.S in Mechanical Engineering

September 2012 - August 2016

PROFESSIONAL EXPERIENCE

Dynasticx LLC

Seattle, WA

UX Consultant

July 2024 - June 2026

- Designed dashboards for a retail sales analysis platform to decrease time to diagnose issues by 30%.
- Used Gemini and Figma AI-assisted flows in the design process to create personas and generate design explorations.
- Created user flows, journey maps, high-fidelity mockups, and interactive prototypes on Figma to streamline the user journey.
- Conducted a heuristic evaluation to identify user pain points and resolve usability issues.

Fountane LLC

UX Design Analyst

- Designed key features for an automotive servicing platform, improving task completion rates by 25%.
- Conducted user interviews, created requirements, and designed a diagnostic and complaint registry tool, reducing complaint calls by 60%.
- Conducted usability testing to validate solutions, reducing bugs by 33%.

UX Design Intern

- Conducted user research and interviews to conceptualize and design an industrial tax compliance web app.
- Created low-fidelity wireframes to improve clarity and accelerate development timelines by 2 months.

UX Designer

- Collaborated with clients, designers, and developers to strategize and design an e-commerce platform. Created personas, journey maps, workflows, and mockups, reducing order processing time by 15%.
- Designed a genomic healthcare app, developing personas, user flows, and wireframes to manage patient data securely.

UXReactor

UX Designer

- Redesigned the AmEx Developers website using UXPin and Sketch, increasing developer task efficiency by 20%.
- Identified requirements and designed interactive dashboards for network admins, reducing debugging time by 33%.

Interaction Designer

- Designed user flows, wireframes, and interactive prototypes for healthcare payment solutions, including patient cost estimation, billing management, and rules engine tools, simplifying complex financial and administrative workflows.
- Created a patient billing dashboard, streamlining payment reminders and outstanding balance management to reduce manual administrative effort.
- Designed a rules engine interface, enabling IT administrators to configure and manage business rules, improving operational efficiency and scalability.

SKILLS

UX Research: User Interviews • Design Strategy • Usability Testing • Heuristic Evaluation • Card Sorting • Personas • Journey Maps

UX Design: Interaction Design • User Experience Design • Visual Design • User Flows • Wireframes • Prototypes • Design Systems

Tools/ Languages: Figma • Sketch • UXPin • HTML • CSS • JavaScript
